QUESTION:

I never received my tax refund for 2018. How can I get it?

ANSWER:

Every year I get several questions along the same line. The IRS recently reported that they have about \$175 million in undelivered tax refunds. These are for more than 100,000 taxpayers. You may be one of them. The failure in delivery was usually due to faulty addresses. One good way to avoid this in the future is to have your refund check direct deposited into your bank account. For 2019 to current, many refunds have been lost due to the COVID-19 crisis. With the IRS not working in 2020 and an overwhelming backlog, many refunds have simply been lost in the system. The best way to try to recover your refund now is to visit the IRS website at www.irs.gov and look for the "Where's My Refund" tool on the front page. If you do not have access to the internet, you may call the IRS at 1-800-829-1040 and a representative will help you. Also, we can track down your refund for you. Good luck! Visit my blog at www.greenelaw.legal to learn more. If you would like my help in recovering your refund, please come in for an appointment. Your initial consultation is free and you will be under no obligation. For all of my readers, if you have any legal problems, such as unpaid taxes, probate or estate planning needs, I can help. Don't forget that we can now prepare and file your return for you.
